

Instruction

The educational game "The safety road ". The board game is designed for two to four players. Options: eight game chips (pedestrian and driver), ten cards with questions, twenty cards with answer options (for each player there are five), one hundred and sixteen bonuses (prize) cards, a playing field.

Rules of the game

Before the start of the game, each of the players chooses for himself a game character - a participant in the movement - a pedestrian or driver. Five cards with answer options are dealt to participants. Cards with questions are shuffled and postponed.

Game progress:

- 1) Players move the chips around the field using a cube and stop at various places (they are marked with numbers on the playing field). Participants have the right to walk in any direction. When one of the participants stops and pulls the card, the others also respond regardless of where the field is located. After answering the question, players cannot stop at the same place.
- 2) At each stop, the facilitator pulls a card with a question. All players choose their answer option and show the leader. The bonus (candy) is received by the one who answered correctly.
- 3) The one who collects as many bonuses as possible wins.

Questions are divided into main ones (blue with three answers). They must be answered with cards "the first answer is correct", "the second answer is correct" and "the third answer is correct". There are also bonus questions (green-red). They must be answered with the cards "it is allowed" and "it is not allowed". For the correct answer to the bonus question, the player receives two candies.

Appendix

Keys for questions:

- 1) the second answer
- 2) it is not allowed
- 3) the third answer
- 4) the first answer
- 5) the third answer
- 6) the third answer
- 7) it is not allowed
- 8) the first answer
- 9) it is allowed
- 10) it is not allowed
